PERSONAL PROFILE

Enthusiastic and resolute MERN STACK developer driven by a fervor for crafting top-notch web applications. Actively pursuing a stimulating and dynamic professional setting to leverage expertise and proficiency in developing cutting-edge web solutions, thereby fostering the advancement and triumph of the organization.Keen to expand knowledge, advance as a developer, and create a significant influence

PROJECTS

E-Commerce Web Apllication
Github

Constructed an e-commerce application leveraging the MERN stack, skillfully weaving together MongoDB, Express.js, React, and Node.js. The resulting platform delivers a dynamic shopping experience, enriched with real-time updates and robust authentication features, showcasing the MERN stack's effectiveness in developing cutting-edge web solutions..

Movie Web Apllication
Github

Developed a CRUD application using HTML/CSS, Express, Node, and MongoDB, demonstrating proficiency in crafting user-centric web applications. The project, built with HTML, CSS, JavaScript, Express, Node, and MongoDB, incorporates user authentication for enhanced security.

College Administration Website
Github

Developed a College Management Application utilizing React, Express, Node, and MongoDB tailored for administrators. This app facilitates tracking academic progress and attendance while serving as a secure communication portal for streamlined educational institution management.
Implemented with React, Node, Express, and MongoDB
The project enables students to access comprehensive details via the website.

Personal Portfolio Site
Github

Designed and developed a vibrant portfolio website using ReactJS, HTML, CSS, and JavaScript to showcase my expertise in front-end development. This project emphasizes my skills in creating engaging and interactive user interfaces. Furthermore, the website features a dedicated section displaying my CV, offering visitors a thorough overview of my education, skills, and professional experience.
